AB Furfuryl Pr disulfide, in organoleptically purified form and unaccompanied by substances of natural origin present in cooked beef and onions, is used as a flavoring. The flavoring agent may be used in a wide variety of ingestible vehicles to augment or enhance the aroma or taste of foods, particularly meat products, dairy products, and beverages. Thus, 0.5 ppm furfuryl Pr disulfide imparted a fatty, onion-like and juicy quality to bouillon soup. The flavoring is prepd. by reacting sodium furfurylthiolate with sodium propylthiosulfate.
